Server Lifter

SL

Specifically designed and tested for operation in all data center environments, including aluminum floors. This manual lifter, which can be towed by the MT700 vehicle, ensures accurate alignment of equipment and eliminates risk to personnel and equipment.

- Easy loading/unloading in confined areas within Data Centers
- Stable, super maneuverable operation virtually anywhere a person can walk, including elevators.
- Easy transport of most IT equipment components throughout the Data Center, with its **650lb. cargo weight limit**.
- Balloon Tires (optional foam filled) for safe use on raised floors.
- Constructed of Tig Welded aluminum for lighter weight and lower center of gravity of the trailer.
- Weight capacity of shelf pull-out slides and plastic-topped equipment deck is 650lb.
- Pre-attached aluminum mounting/tie-down brackets on each plastic-topped equipment deck permit any load to be secured for transport, and easily assessable when securing IT equipment.

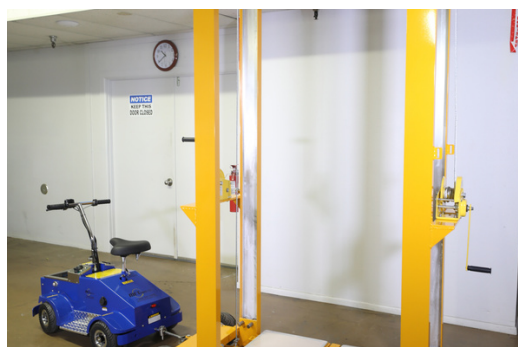

Manual Tandem Lift

By combining the use of the MT700 vehicle to tow the Manual Tandem Lift as a trailer, the speed at which IT equipment is transported is greatly increased. Specifically designed and tested for operation in all data center environments, including aluminum floors. This manual lifter allows for removing server cabinet IT equipment and installing replacement equipment in one operation.

- Easy loading/unloading in confined areas within Data Centers
- Stable, super maneuverable operation virtually anywhere a person can walk, including elevators.
- Easy transport of most IT equipment components throughout the Data Center, with its **650lb. cargo weight limit**.
- Balloon Tires (optional foam filled) for safe use on raised floors.

- Weight capacity of shelf pull-out slides and plastic-topped equipment deck is 650lb.
- Pre-attached aluminum mounting/tie-down brackets on each plastic-topped equipment deck permit any load to be secured for transport, and easily assessable when securing IT equipment.

Workbench

The METransport Work bench can be used as a trailer towed by the MT700 vehicle and/or operated independently as a fully controlled 4-wheel steering cart in data center environments. The work bench has a load capacity of 400 lbs. and ample room for tools, test equipment, and replacement parts. Equipped with a high, shock deadening, anti-static, hard neoprene rubber work surface.
